

Summary #8, The Hey-Relax-You-Did-Good Summary

This last section took a moment to wind down, to give you some pointers as to how you can use Ruby. If you enjoyed yourself, download Ruby and install it.

- For Mac: [RVM](#)
- For Windows: [Rails Installer for Windows \(includes Ruby\)](#)
- Other platforms: [Source](#)

Once you have Ruby installed, you can use Interactive Ruby by running `irb` on your system's prompt.

You really deserve a double-layer cake with double-double frosting and a guy playing one of those guitars that's a double guitar. I mean you finished, you really did! No doubt about it, you're a certified red-blooded smartiac!

credits

a tribute to [why's \(poignant\) guide to ruby](#). chunky bacon.

```
=> #
<NoMethodError: undefined method `h1' for main:Object>
> Popup.make do
.... h1 "Me Blog"
.... h2 entry.title
.... p entry.fulltext
.... end
.. end
=> #
<NoMethodError: undefined method `h1' for main:Object>
> next
> Time.now - 2.weeks
=> 2013-03-20 00:24:43 +0000
Success!
